Inspiration TALKS with Dentsply Sirona Implants— Superheroes, solutions and science

Friday, June 22, 12.30–14.00, Plenary Hall

What does a superhero and a dental professional have in common? They both help people where and when they need it the most, finding the best solution for each individual. While the traditional superhero fights villains, the superheroes in dentistry fight bone resorption and edentulism, but more importantly, help and support dental patients on the journey to improved function, esthetics and quality of life.

Let's meet some of our superheroes, from scientists and stem cell researchers to periodontists and surgeons, and they'll tell you about their superpowers and how they make a difference.

Pick up your lunchbox

Pick up and enjoy your complimentary your lunchbox when attending Inspiration TALKS.

A man and a woman are standing side-by-side, smiling warmly at the camera. The man, on the left, has dark hair and a light beard, wearing a dark blue blazer over a black t-shirt. The woman, on the right, has long dark hair and is wearing a light grey blazer over a white collared shirt. They are positioned in front of a bright, slightly blurred background that suggests an office or professional setting.

Making the difference together

Together with dental professionals all around the globe, we make the difference to the lives of over six million dental patients every day. With better, safer and faster treatment solutions, we help them eat, speak, and smile with confidence.

At EuroPerio9, you will discover highlights from our comprehensive implant and preventive solutions portfolio. Join us during Inspiration TALKS on Friday at 12.30 and visit our exhibition booth to explore comprehensive solutions for predictable and lasting implant treatment outcomes as well as innovative preventive solutions for improving oral health.

We look forward to meeting you here in Amsterdam.

Implant dentistry from A to X

Our comprehensive solutions for all phases of implant therapy create value for dental professionals and allow for predictable and lasting implant treatment outcomes, resulting in enhanced quality of life for patients.

Treatment planning

Simplant, our digital treatment planning platform and service for guided surgery, ensures accuracy in planning and execution of the implant treatment. It is compatible with all major implant brands, giving you the freedom to use your preferred implant system.

Regenerative solutions

Our Symbios portfolio for hard and soft tissue regeneration provides ease of use and safety for predictable, long-term outcomes. The solutions promote bone formation, volume and stability and include bone graft materials, resorbable and non-resorbable membranes, and instruments.

Implant systems

Our well-documented, world-class implant systems have their own unique benefits and deliver exceptional, long-term, esthetic results. Ankylos is the engineered solution

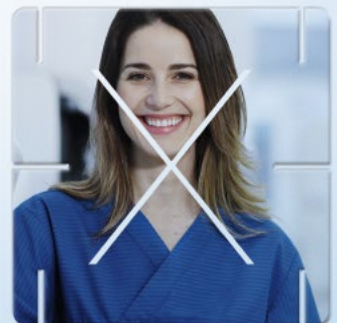

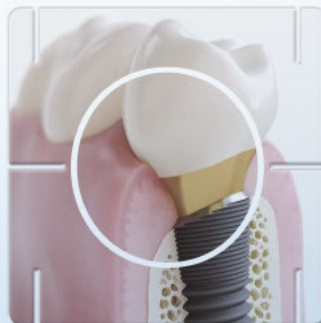

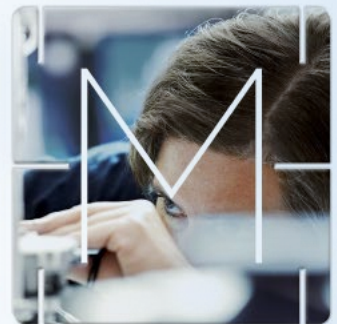

for all clinical indications with its predictable, natural esthetics. Astra Tech Implant System offers surgical simplicity, accuracy and restorative ease. Xive is a smart, intuitive and flexible flat-to-flat implant system offering superior primary stability.

Restorative solutions

Our patient-specific restorative solutions, including Atlantis abutments and suprastructures, meet patient requirements by utilizing state-of-the-art digital technology to mimic natural tooth function and esthetics. The solutions are available for all major implant systems, giving you the freedom of choice.

Professional and business development

We offer world-class educational programs for all members of the treatment team, and marketing tools and services to support the continued development of the dental practice and laboratory.

Solutions by Dentsply Sirona Implants

Welcome to our exhibition booth where you can explore highlights from our comprehensive solutions portfolio for predictable and lasting implant treatment outcomes.

SmartFix—the smarter choice for restoring smiles

The SmartFix concept used in combination with the Astra Tech Implant System EV allows for shorter treatment times, simplified procedures, and streamlined workflows—without compromising reliable treatment outcomes for your edentulous patients.

Streamlining your workflow

Angled screw access channel
Angling the screw access channel is a unique option of Atlantis bridges and hybrids, promoting ideal esthetics and function as well as simplifying handling during installation and removal of the prosthesis.

Maximize marginal bone preservation using OsseoSpeed Profile EV

Tilting the unique, sloped OsseoSpeed Profile EV implant means less bone removal at installation through less submerged placement.

Easy abutment seating
The short and flexible holder allows for easy seating of Multibase EV abutments, even when space is limited.

Book your practical SmartFix experience

Sign up for a 30-minute hands-on training at the Dentsply Sirona booth and discover SmartFix, using the unique, sloped OsseoSpeed Profile EV implant.

Friday, June 22 and Saturday, June 23, during all breaks

SmartFix concept is available for Astra Tech Implant System EV, including OsseoSpeed Profile EV, and for Ankylos and Xive implant systems.

Backed by sound science

Nine out of 10 implant systems and manufacturers have no clinical documentation*. For us, this is unthinkable and unacceptable. Our comprehensive study program includes more than 2,000 published scientific references.

Our strong commitment to research and development, and our collaborations with universities, dental professionals, researchers and industry leaders ensure the highest level of quality in our products and solutions to provide successful implant therapy for life-long function and esthetics.

Meet our scientific team at the booth to learn more.

*Jokstad 2009, Osseointegration and Dental Implants (chapter 1), Wiley-Blackwell

Symbios—solutions for all your regenerative needs

Discover our full range of reliable bone graft materials, resorbable and non-resorbable membranes and instruments at the booth.

Algipore graft material

Celebrate with us 30 years of Algipore, a proven natural phycograft material originating from calcifying red algae.

The osteoconductive and biodegradable properties are the reason that Algipore can act as a stable scaffold during the bone formation phase and then over time be replaced by natural bone.

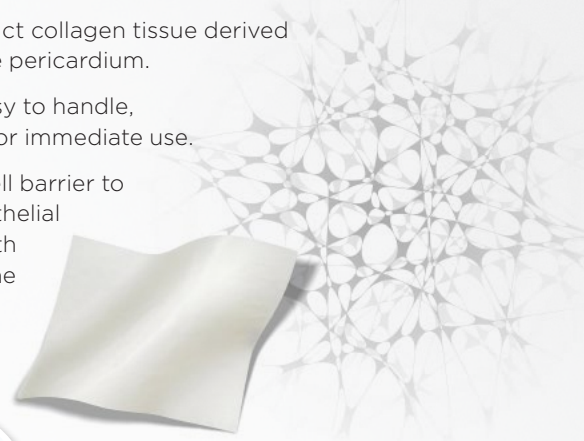

With documented predictable and effective treatment outcomes, Algipore is a natural choice for your patient.

New 10-year study results by Fouad Houry et al., showing stable vertical bone levels using a layering technique. Available at our booth.

Symbios® Collagen Membrane pre-hydrated

- The first pre-hydrated regenerative solution.
- Purified intact collagen tissue derived from bovine pericardium.
- Flexible, easy to handle, and ready for immediate use.
- Acts as a cell barrier to prevent epithelial down growth into the bone defect site.

Sign up to learn from the expert

Thomas Hanser presents the application of Algipore and the Symbios Collagen Membrane pre-hydrated during 30-minutes hands-on trainings at our booth. Please sign up in advance—seats are limited.

Thursday, June 21 during all breaks.

Simplant—solutions for digital treatment planning

From dental scanning and planning, to drilling and implant placement, Simplant offers clinicians a comprehensive 3D system for accurate and predictable implant treatment.

mySimplant® Planning Service

With an eye to providing clinicians with a solution to grow their business without compromising the clinical outcome of their case, mySimplant Planning Service eases clinicians into the world of implant treatment.

Simplant® Pro 18 software

Simplant Pro 18 is one of the most comprehensive dental implant planning suites on the market, giving you all the innovative tools in the Simplant portfolio.

Explore our digital solutions

Make a digital scan with the CEREC Omnicam and discover Simplant digital treatment planning and guided surgery.

Patient-specific Atlantis abutments and suprastructures are on display at the booth—our digital team looks forward to discussing digital implant workflows with you.

Solutions by Dentsply Sirona Preventive

Preventive is ... a continuum of care

Preventive care involves a careful series of steps, clinically-proven and trusted products, patient self-care education, continual learning, and people—all working together—to promote a lifetime of oral health.

At Dentsply Sirona Preventive, we're committed to providing the solutions, education and support dental professionals need at every stage of the preventive procedure. And through this partnership, we're making a difference in patients' lives all over the world.

Dentsply Sirona Preventive's solutions include:
