# Inspiration TALKS with Dentsply Sirona Implants— Dreams of the future

Friday, October 12, 17.00–19.00, Room Salzburg

Do you dream of creating excellent results that really make the difference for patients? Results that provide a lifetime of optimal function and individualized esthetics? We dream too. Of groundbreaking innovation, ingenious technology and simple procedures that respect biology and mimic nature.

Together with dental professionals, we make dreams come true today and tomorrow. Innovative solutions and professional implant skills make the difference.

# Implant dentistry from A to X

Our comprehensive solutions for all phases of implant therapy create value for dental professionals and allow for predictable and lasting implant treatment outcomes, resulting in enhanced quality of life for patients.

## Acuris™ – conometric concept

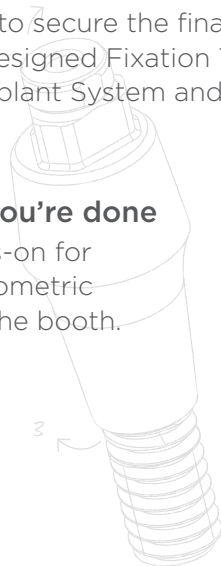

### Retention redefined

Discover a game-changer in fixed retention at our exhibition booth. Instead of cement or screws, Acuris uses friction retention. This saves time, simplifies the procedure and all it takes to secure the final crown is a single click using our unique and newly designed Fixation Tool. Acuris is launched for Ankylos, Astra Tech Implant System and Xive. **Time-saving has never been easier.**

#### Click and you're done

Join a hands-on for Acuris—conometric concept at the booth.

#### Innovation requires teamwork

Ask the research & development engineers and clinical advisors at the booth about Acuris.

#### Acuris saves you 15 minutes

Take a 15-minute break from the congress to relax with a massage.

15 minutes

#### Celebrate the game-changer

Pass by the booth on Thursday at 15.00, have a glass of sparkling wine and toast our latest innovation.

## Highlights and innovations from our comprehensive solutions portfolio at EAO 2018

### Xive® implant system

A new curve is the straight line to better results. Updated Gingiva Formers and Impression Copings add convenience in the daily routine and provide improved esthetics.

### Azento™

A convenient start-to-finish implant solution streamlining planning, purchasing, and delivery and enabling dentists to provide consistently excellent implant treatments.

Coming to Europe in 2019.

### Algipore® graft material

Algipore, a proven natural phycograft material originating from calcifying red algae, documented and in clinical use since 30 years.

### CEREC Guide 3

The new surgical guide enables you to place Ankylos, Astra Tech Implant System EV and Xive fully guided using your chairside workflow. CEREC Guide 3 can be easily produced in the practice in less than an hour and very cost effective.

### Symbios® Collagen Membrane pre-hydrated

The first unique, predictable and pre-hydrated regenerative solution consisting of purified intact collagen tissue derived from bovine pericardium.

### Atlantis® solutions via inLab SW 18

With inLab SW 18 connecting to our world-class Atlantis patient-specific solutions becomes easier. As an intuitive, integrated solution, inLab SW 18 aims for streamlining the laboratory workflow.

For the best possible expert advice, our implant systems and Acuris will be presented at our exhibition booth, while our regenerative and digital solutions are on display in our Hospitality Lounge. We look forward to meeting you there.

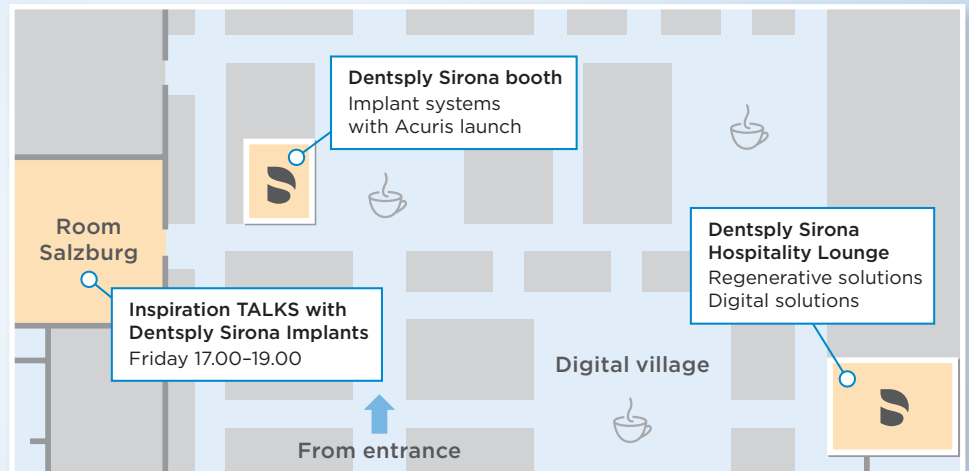

# Making the difference together

Together with dental professionals all around the globe, we make the difference to the lives of over six million dental patients every day. With better, safer and faster treatment solutions, we help them eat, speak, and smile with confidence.

At EAO in Vienna, we present highlights from our comprehensive implant solutions portfolio. Join us during Inspiration TALKS on Friday at 17.00. Visit our exhibition booth featuring Acuris, a time-saving innovation that redefines retention. And meet us in the Hospitality Lounge for a nice coffee while discovering digital implant workflows, regenerative solutions and the scientific documentation behind our products and solutions.

Welcome to Dentsply Sirona at EAO 2018 in Vienna.

For the best possible expert advice, our implant systems and Acuris will be presented at our exhibition booth, while our regenerative and digital solutions are on display in our Hospitality Lounge. We look forward to meeting you there.

Acuris™

# Retention redefined

Time-saving has never been easier

## Click, and you're done

Instead of cement or screws, the conometric concept uses friction retention to secure the cap and crown onto the abutment. Here is why this is a game-changer:

- Placement of the crown takes seconds rather than minutes.
- No screw—improved esthetics, due to no visible screw access holes.
- No cement—less risk of biological complications.
- The procedure is easier to perform.
- This is a fixed retention, but it can be retrieved for extra-oral cleaning or maintenance.

What is even more spectacular: to place the final crown, you only need to click once on the crown with our unique Fixation Tool.
