Digital orthodontic workflow with Primescan

Greater range of services for long-term practice growth

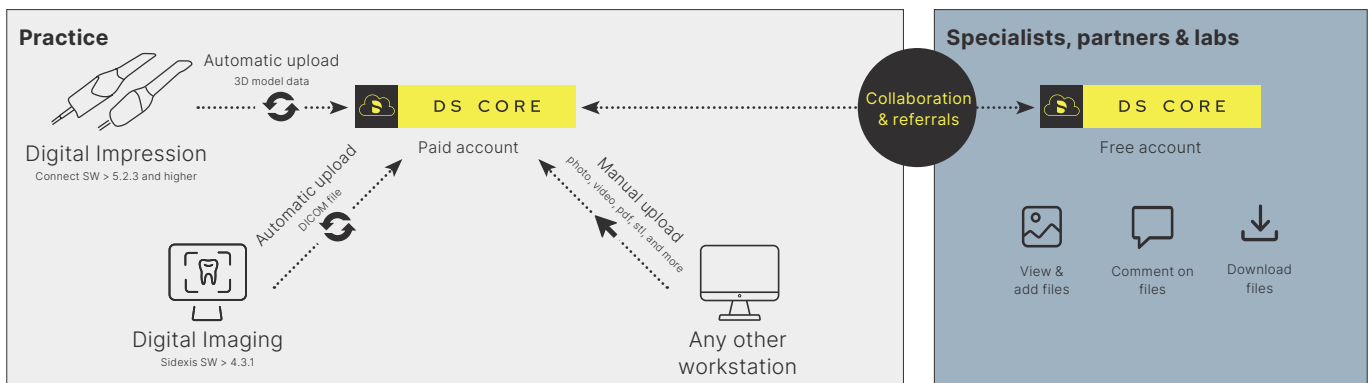

More and more often, patients ask for orthodontic corrections for various reasons. Digital Impression opens up the digital world of orthodontics and enables you to satisfy your patients' desire for a healthy, beautiful smile made by the dentist they trust: you. Thanks to Primescan powered by DS Core™ you can work with specialized partners to order orthodontic appliances - or take advantage of Dentsply Sirona's seamless digital workflow with SureSmile® treatment planning software.

Practice growth with Primescan

<p>Increased patient comfort</p> <p>Digital impressions with Primescan eliminate the risk of contaminated impression trays.</p> <p>Variety of workflow options</p> <p>In addition to supporting digital workflows for SureSmile® clear aligner cases, Primescan can also help you with bonding trays, retainers, and other ortho applications.</p>	<p>Practice efficiency</p> <p>Raise efficiency in the practice by delegating easy and intuitive impression taking with Primescan.</p> <p>Efficient sales tool</p> <p>Support your diagnosis with an instant model analysis and help your patients make their aligner treatment decision with a simulation right after the scan.</p>

Benefits of DS Core™ for Digital Impression

With DS Core™, Dentsply Sirona offers a cloud-based platform that combines products, services and technology that empowers your practice growth through efficiency and connectivity.

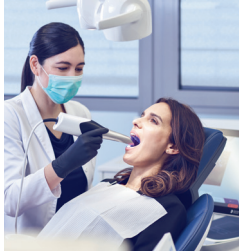

Share & collaborate
Efficient collaboration with specialists, partners and labs. Send patient records to your colleagues with the click of a button.

One central library
Easily combine digital impressions and x-rays for any workflow in one library. Scans and images will be automatically uploaded from your Dentsply Sirona equipment.

Easy access
Access the platform from multiple devices easily through a web browser. View, download and manage case files from different equipments, no matter where they are located.

SureSmile® treatment planning with Primescan

Dentsply Sirona's trusted brands have empowered dental professionals in both practices and laboratories, to provide better, safer, and faster care in all dental disciplines for over 100 years. We've taken our experience in digital planning combined with our experience as a dental solutions company and provided you with a simple way to conduct initial setups and treatment plans that result in predictable, compelling results.

Collecting the records

Photos and digital impressions are taken at the first appointment. SureSmile® treatment planning workflow pairs seamlessly with Primescan to capture digital impressions.

Using
DS CORE™

Automatic upload of the model data as .dxd file for convenient cloud storage of patient files with remote access using a web browser or at any workstation in your practice at any time.*

Checking and analyzing

The optional CEREC Ortho Software enables you to perform a model analysis and treatment simulation for higher case acceptance right after the scan.

Submitting the treatment plan

Take advantage of the integrated workflow and transmit your case seamlessly to Sure Smile® via Connect Case Center for clear aligner treatment planning. All treatment plans submitted go through a comprehensive planning process and a final quality inspection by our digital lab specialists. Sure Smile® clear aligners are then custom fabricated using an innovative process. This ensures excellent initial setups for the manufacturing of the aligners.

Treating your patient

When the patient kit, SureSmile® VPro™, and SureSmile® clear aligners arrive at your practice, it's time to start treatment. After the treatment SureSmile® retainers are essential to ensure that the happy patients' new smiles stay straight.

Using
DS CORE™

Store photos and additional files all along your patient's treatment in DS Core™. Access your patient records at any time and easily share them with specialists when needed.

"My Primescan is the digital hub of my practice and the seamless & efficient workflow it allows to plan SureSmile aligner cases has increased my case acceptance tremendously. Patients appreciate the ease of scanning a full mouth in just a few minutes and my team values the rapid integration to review cases. As a general dentist who provides a wide range of dental services, having rapid integration of my technology is essential and with Primescan and SureSmile I certainly have that!

Dr. Mona Patel | Bayshore Dental | Milwaukee, USA
